IBM Award - Best 1st-Year CIS, 2024 | BBD Award - Best 2nd-Year CIS, 2025 | Hult Prize 2nd Place, 2024 | Leadership Award, 2025

PROFESSIONAL SUMMARY

IBM & BBD Award-winning BCIS Honours student with hands-on experience applying structured systems analysis, UML modelling, and requirements gathering to real business problems. Conducted an independent UX and digital strategy audit for Massmart (Makro), identifying 10+ friction points across key user flows and delivering data-backed recommendations to senior stakeholders. Led the end-to-end requirements analysis, scope definition, and system design of ClassBuddy - a live web application solving a real student problem - demonstrating the full BA/SA process from problem identification through to a delivered, working solution, with AI-assisted tooling. Five officially certified UFS Demonstrator roles demonstrate structured thinking, clear communication, and consistent reliability. Seeking a Business Analyst, Systems Analyst, or IT Graduate role across South Africa.

SKILLS

Analysis: Systems Analysis - Requirements Gathering - Gap Analysis - Process Mapping
Modelling: UML - Use Case, Class, Activity, Sequence - Flowcharts - ERDs
Research: UX Research - Journey Mapping - Stakeholder Interviews
Reporting: Audit Reports - Business Cases - Process Documentation
Tools: Visio - Draw.io - Power BI - MS Office Suite
Technical: SQL - C# - JavaScript - HTML5 - Git

WORK EXPERIENCE

UX Researcher & Digital Strategy Intern

Massmart (Makro) - Walmart Group | Jun 2025 - Jul 2025

Independent structured audit of Makro's e-commerce platform using BA frameworks, journey mapping, and scenario-based testing - delivering findings to senior stakeholders.

- Conducted an independent structured audit of Makro's e-commerce platform using BA frameworks, journey mapping, and scenario-based testing
- Identified 10+ UX friction points across key user flows - onboarding, search, checkout, and post-purchase - on both website and mobile app
- Produced a professional audit report with data-backed, business-aligned recommendations prioritised by impact
- Presented findings to senior stakeholders in a formal 30-minute session with Q&A
- Applied requirements analysis and gap analysis techniques to align identified issues with business improvement goals

A-STEP Tutor - CSIS1534

University of the Free State - Dept. CS & Informatics | 2026 - Present

Academic Support tutor under the UFS A-STEP programme, providing structured tutorial sessions for first-year students in a core programming module.

- Translate complex technical content into clear, structured explanations - a core communication skill for Business Analysts
- Apply structured problem-solving methods to guide students independently, reinforcing analytical thinking
- Track student attendance and progress, reporting to the supervising lecturer

Structured Communication | Analytical Thinking | Academic Support | Reporting

Demonstrator - C# Programming, UML & Systems Infrastructure

University of the Free State - Dept. CS & Informatics | 2024 - 2025 | 5 Modules, Certified by UFS

Certified Demonstrator across five modules - teaching UML modelling, systems analysis, and enterprise infrastructure to second-year students.

- Taught UML modelling - use case, class, activity, and sequence diagrams - using Microsoft Visio and Draw.io
- Guided students through systems analysis tasks: translating business requirements into structured software design documentation
- Covered enterprise infrastructure, network diagrams, and systems integration patterns in a practical setting
- Managed mark-bearing weekly attendance records and invigilated module tests - certified by Head of Department
- Strengthened own BA/SA skill set by applying systems design concepts in a consistent, student-facing teaching context

UML Modelling | Systems Analysis | Business Requirements | Visio / Draw.io | OO Design | Documentation | Certified x5

Corridor Prime (Ikhamanga) - Honorary Leadership Award

House Beyers Naude, UFS | 2025

Formally recognised with an Honorary Award for Exceptional and Noteworthy Leadership - signed by the Residence Head and RC Vice Prime.

- Appointed student leader responsible for welfare, conduct, and day-to-day operations of a diverse student community
- Mediated conflicts, enforced access control protocols, and maintained a safe, respectful living environment
- Communicated regularly with residence management, coordinating between student needs and institutional requirements
- Awarded a formal Honorary Award for performance that exceeded standard expectations of the role

Leadership | Conflict Resolution | Stakeholder Communication | Community Management | Honorary Award

EDUCATION

Bachelor of Computer and Information Systems Honours (BCIS Honours)

2026 - Present

University of the Free State, Bloemfontein

Bachelor of Computer and Information Systems (BCIS)

2023 - 2025

University of the Free State, Bloemfontein

- IBM Award - Best First-Year CIS Student (April 2024)
- BBD Award - Best Second-Year CIS Student (April 2025)
- Hult Prize - 2nd Place, Innovation & Entrepreneurship Challenge (2024)

KEY PROJECTS

Makro Digital Experience Audit

[View Case Study](#)

Full BA/SA case study - published online with methodology, scope, findings, deliverables, and outcomes.

- Demonstrates end-to-end requirements analysis, structured documentation, and stakeholder reporting in a real corporate environment
- Full methodology documented and publicly accessible via the portfolio link above

ClassBuddy - Timetable Management Web Application

[Live App](#)

Problem-to-solution project - applied the full BA lifecycle to identify a real student pain point and deliver a working product.

- Identified the problem through observation and informal stakeholder research - university students losing hours each semester to manual timetable organisation
- Gathered and documented requirements: clash detection, group selection, calendar export, user accounts, and a feedback system
- Defined scope, system boundaries, and user flows before delivery began - producing structured process documentation
- Managed the end-to-end delivery of a live, publicly accessible solution that solves the identified problem for real users
- AI-assisted tooling used during delivery, demonstrating awareness of modern productivity methods in a project context
- Demonstrates the ability to take a problem from initial discovery through requirements, design, and a delivered working solution

CERTIFICATIONS & SERVICE AWARDS

- Introduction to Business Analysis - LinkedIn Learning | IIBA Endorsed, 3.00 CDUs (Mar 2026)
- The Role of Business Analysis in Data Analytics - LinkedIn Learning (Mar 2026)
- Introduction to Cybersecurity - Cisco Networking Academy
- Power BI: Dashboards for Beginners - LinkedIn Learning
- Front-End Web Development with .NET - LinkedIn Learning
- Mastering AI Tools for C# Development - LinkedIn Learning
- UFS Certificates of Service (x5) - Dept. of CS & Informatics, UFS (certified by Head of Department)
